

The following instructions will help you to install your template.

1. Installation

There are two ways of installing:

- a) Through admin section of your Joomla CMS
- b) Manually (by copying all template files in templates directory of your Joomla CMS)

Installing through installer of your Joomla CMS.

In the administrator section of your site go to main menu, then Extensions->Install/Uninstall, then chose templates section.

Then in the “Upload package file” section open an upload file dialogue box by clicking on “browse” button find the zipped template and then click upload file and install.

Then go to administrator section, there through the main menu go to Extension->Template manager->Site templates. Then choose the newly installed template by clicking on the radio box and click Default. This way you make your template the default one for your site.

Installing through admin section of your Joomla site.

First you have to copy the template to the “templates” folder of your Joomla CMS.

Then go to administrator section, there through the main menu go to Extension->Template manager. Then choose the newly installed template by clicking on the radio box and click Default. This way you make your template the default one for your site.

2. Changing modules position and applying class suffixes.

Our templates are supplied with predefined module positions, for instance top menu is placed on the top block. That means that the “top menu” module should be assigned to Top position in the modules section. Right after Joomla installation, modules are assigned to different positions, in order to make template look as it is given on our live demo you have to assign modules to their positions and change the class suffix value in the following way.

- a) In the administrator section go to Extension-> Module Manager
- b) open each module from the list bellow and assign to the given position and apply the class suffix to it :

Module Name	Position	Module Class Suffix	Published	Show title
Breadcrumbs	breadcrumb	-	yes	yes
Banners	footer	-	no	yes
Footer	footer	-	no	yes
Main Menu	left	_menu	yes	yes
Resources	left	-	no	yes
Key Concepts	left	-	no	yes
User Menu	left	-	no	yes
Example Pages	left	-	no	yes
Statistics	left	-	no	yes
Login Form	user2	_s2	yes	yes
Archive	left	-	no	yes
Sections	left	-	no	yes
Related Items	left	-	no	yes

Wrapper	left	-	no	yes
Feed Display	left	-	no	yes
Polls	left	-	yes	yes
Who's Online	left	-	no	yes
Advertisement	right	-	no	yes
Random Image	right	-	no	yes
Syndication	syndicate	-	no	yes
Newsflash	right	-	no	yes
Latest News	user1	-	yes	yes
Popular	left	-	no	yes
Top Menu	top	_s10	yes	no
Search	user4	_s7	yes	no

c) after all necessary changes are applied you have to save values of each module by clicking “save”.

Attention! : By default Joomla! 1.5 installation comes with only Main Menu module installed therefore to make your Joomla site look like our live demo you have to install all necessary modules through the administration section of your site. Also you have to add All menu Items and articles yourself.

3. Changing Menu Style:

The top menu style should be set to “List”. To change the style go to Extensions->Module Manager, there chose Top Menu. In the opened window find parameters field set the Menu Style property to “List”. Make sure that menu class suffix is set to '-nav'

The main menu style should be set to “List”. To change the style go to Extensions->Module Manager, there chose Main Menu. In the opened window find parameters field set the Menu Style property to “List”.
